Mamoun Shop

Mamoun Shop:

A website that allows people to buy and sell physical goods, services, and digital products over the internet rather than at a brick-and-mortar location.

One of the major benefits of e-commerce websites for businesses is the ability to reach a global audience. With the internet being accessible from anywhere in the world, businesses can sell their products to customers located in different countries .

This opens up new opportunities for growth and expansion . E-commerce websites also provide businesses with valuable insights into customer behavior, which can be used to improve their marketing and sales strategies.

Through an e-commerce website, a business can process orders, accept payments, manage shipping and logistics, and provide customer service.

It has 3 types of users:

Visitors : are users who have not yet registered on the website. They can browse the site and view product information , but they cannot make purchases or interact with other users.

Visitors Can Create and account by providing their personal information and become users.

In conclusion : Visitor can only view product listings, in order to take advantage of the functions offered by the latter, he must identify himself or create a new account.

User : Are registered member of the website who have access to additional features and functions.

They can add items to their shopping carts, view their order history , and access their personal information.

They can also leave product reviews, ratings, and feedback to help other users make informed purchasing decisions.

In conclusion : When the visitor have login she become a user he can buy products with his paypal account.

Admin: Admins are responsible for managing the website and ensuring its smooth operation.

They have access to all the features and functions of the site and can perform actions such as adding and removing products , managing user accounts, processing order, and analyzing website data.

Admins are essential for maintaining the integrity and security of the website and ensuring that it operates effectively and efficiently

In conclusion : Can create, edit and delete the products and he receives the information of the purchases of his products and the user details .
